Python Assignment 7| Coding Blocks Junior

1. Write a program which takes a string from user input and prints that output in all capital letters. Ex: input: "hello crazy people", output: "HELLO CRAZY PEOPLE".
2. Write a program that accepts a string and outputs the string with all capital letters.

    Example: 'hello' ==> 'HELLO' (using loop).

3. Write a program which accepts two strings s1 and s2 and checks if s2 is a substring of s1.
